- **Summary: -**

Data Science student with hands-on experience in Python, SQL, and machine learning. Skilled in data cleaning, visualization, and building predictive models. Developed real-world projects involving analytics, dashboards, and ML pipelines. Seeking an internship to apply data-driven solutions in real environments.

- **PROJECTS: -**

  - Employee Attrition Prediction System (DEPI):

- Built ML models on 10,000+ records (35+ features) achieving **98%** accuracy
- Performed data cleaning, preprocessing, and EDA using Pandas & NumPy
- Developed a Flask-based system for real-time predictions
- Delivered insights and reports to explain business impact

  - Library Management Database (Oracle SQL):

- Designed relational database with ERD and constraints (PK/FK)
- Implemented advanced SQL queries (JOIN, GROUP BY, subqueries)
- Created views, sequences, and PL/SQL functions

  - More projects: My GitHub

- **SKILLS: -**

• Technical Skills:
- Python, SQL, Excel, Power BI, Pandas, NumPy, Matplotlib, scikit-learn, NLP, EDA, Machine Learning, Data Visualization, Data Cleaning, Feature Engineering, APIs, Web Scraping, Git

• Soft Skills:
- Communication, Teamwork, Problem-Solving, Time Management, Adaptability

• Languages:
- Arabic (Native), English (Fluent)

- **Certifications**: -

  - ❖ Digital Egypt Pioneers Program (DEPI) – Data Scientist Track, Ministry of Communications & Information Technology (2025).
  - ❖ Data Analytics Internship Program – Elevvo (2025).
  - ❖ Power BI Internship – Codveda Technologies (2026)
  - ❖ AI & Machine Learning Foundations – Sprints (2026).
  - ❖ Python Programming Basics – ITI (Mahara-Tech) (2026).

`Certificates available at:` My Certificates

- **Education: -**

- Bachelor of Artificial Intelligence, Menoufia National University, June 2027.
- Major: Data Science
- General Grade: Very Good (Expected Graduation: June 2027)
